

Utility Design Joint Trench Design Services

The utility design process continues to be both challenging and complicated. Not only are the utility requirements constantly evolving and changing, efficient land planning continues to restrain options for infrastructure and component placement. HMH offer's a utility design solution that incorporates up-to-date knowledge on standards and technology matched with clear communication between the utility companies and the design team.

Our proactive approach with utility companies is aligned to meet the project requirements and schedule. We emphasize component placement in the least intrusive areas, respecting the projects site design goals.

We provide utility design services for single-family and multi-family housing projects, commercial, office and industrial projects from concept through to construction.

Services Include

- Preliminary Planning & Consulting
- Due Diligence
- Cost Estimating
- Joint Trench Composite Design
- Consultant Design For PG&E Gas & Electric Systems
- Street Lighting Design
- Contractor Bid Package Preparation
