

## David M. Wilson, P.E. Principal

President / CFO

### EXPERTISE:

With a background in Land Surveying and over twenty years of project design and management experience, David provides the insight to balance technical design precision with the practical aspects of construction. David provides leadership in developing and maintaining HMH's team approach to project design and construction support and provides a system of strong project management for all HMH projects. He provides design oversight on complex projects and reviews HMH documents for technical accuracy, practicality, and constructability.

In addition to providing engineering management oversight, David is responsible for providing company-wide department management accountability, overseeing corporate operations, and management of accounting and administrative functions at HMH. David also led the efforts in expanding HMH's services to include landscape architectural design and joint trench utility design.

David's experience includes design and project management for various projects throughout the Bay Area including public utility projects, public roadway design and rehabilitation projects, residential subdivisions, master-planned communities, commercial centers, industrial developments, high-density urban redevelopment projects, mixed use developments, golf courses, and recreational facilities.
