

William B. Sowa, RLA, LEED GA

Principal / Land Development Manager

EXPERTISE:

Bill is Principal and a Land Development Manager for HMH. His 16 years of professional experience have involved him in a vast range of public and private land development projects. Areas of expertise include project management, resource allocation, quality control, quality assurance, plan implementation and construction observation.

Completed projects under his guidance include institutional, commercial and retail development, single and multi family residential, senior communities, parks and recreation improvements as well as streetscapes and other urban improvement projects.

His oversight of the Landscape Architectural profession allows for the integration of theories, methods, and techniques of landscape architecture and planning into the projects worked on by the division. He contributes to the management of the design process from conceptualization through construction/field observation and is responsible for the division's operational functions.

Bill manages a team of Landscape Architects who understand the importance of project coordination and communication. He emphasizes the need for the Landscape Architect to look at beyond the limits of landscape design. His daily internal interaction with Planners, Engineers, Utility Designers, Land Surveyors and Stormwater Compliance Specialists gives him a comprehensive understanding of site design elements and the ability to offer creative solutions.
